## Water flow tuned by micro/nano hierarchical structures fabricated through two-photon polymerization

### Supplementary File

**Videoclip S1.** Optical microscope video of water flow captured along horizontal direction at different timing for the benchmark substrate.

**Videoclip S2.** Optical microscope video of water flow captured along horizontal direction at different timing for the single-row pinecone structures.

**Videoclip S3.** Optical microscope video of water flow captured along horizontal direction at different timing for the double-row pinecone structures.
